**ArchForKids**  
architecture for children

## **DESIGN A COMMUNITY**

Learn about the concepts of urban planning and what makes up a community. Imagine and design your ideal community and build a model of your design.

## **TRANSFORM A VACANT SPACE**

Vacant spaces cause many problems for neighborhoods. Create and build a model of a design that will transform a vacant space into something beautiful and useful for your neighborhood community! Will you design a park, a theatre, a youth center, a dog park or something else entirely?

## **INTERNATIONAL FESTIVAL**

Imagine a grand festival in your town full of stalls featuring cultures from all around the world! There would be beautiful art, delicious food and people from all over speaking different languages! Choose to design the layout of the festival or to design a specific stall representing a culture you are familiar with or interested in!

## COMMUNITY GATHERING SPACES

Community gathering spaces are important because they allow people to come together and interact with each other. These can be parks, shopping centers, local theaters, community centers and more! Design and build a model of a gathering space of your own!

## ARTISTS' VILLAGE

Design a village suited for all types artists to inhabit! What types of buildings and features will you include in your design? How can design a space that would foster creativity and represent the different artists that live there?

## AMAZING AMUSEMENT PARKS

Design an amusement park full of fun rides and activities for people to enjoy together!
